

## **Safety and Quality Policy**

It is the objective of TOPCAST to repair and maintain Aircraft Components to meet with HKCAD and customers requirements.

It is recognized that aircraft safety is a prime consideration at all times. This safety culture encourages employees to report maintenance related errors or incidents and is to apply human factors principles through Human Factors principles training where appropriate.

It is the duty of all personnel to comply with procedures, quality standards, safety standards and regulations within the organisation.

Quality is maintained by the implementation and audit review of the quality system. All personnel are required to cooperate with the quality auditors. The quality system is supported by this MOE and operating procedures and is a foundation for continuous improvement.
