Connecting
A Better World.

At Topcast, we pride ourselves as one-stop-shop for spare parts, components, raw materials and consumables sourcing service provider with our extensive network of business partners, global sourcing team and decades of experience servicing a vast and diverse customer base. We are a global connector, ultimately, we connect the world.

Airbus recommended
next generation
VOZC converters on
A320 family aircraft

We are committed to delivering the cleanest cabin air with new VOZC technology. To help airlines avoid delays and potential diversions caused by cabin odor issues—often linked to oil and hydraulic fluid from engines and auxiliary power units entering the bleed air stream—BASF’s VOZC solution offers a sustainable, cost-effective way to mitigate these challenges.

We care about your plane’s air quality, so you don’t need to.

VALUE TO AIRLINES

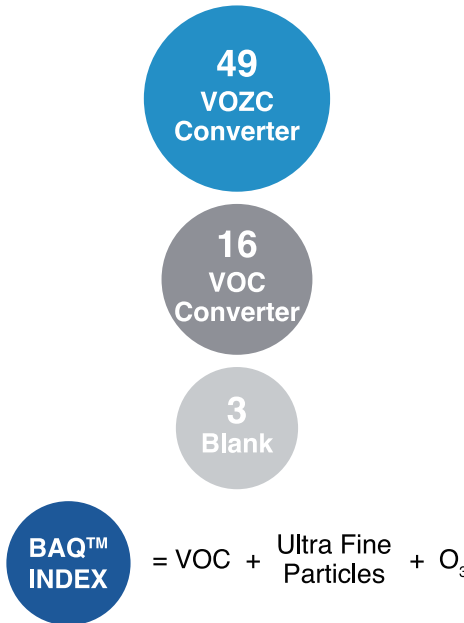

Airlines **reduce the risks of flight delays** due to cabin odor issues and fume events in a cost-effective and easy-to-implement way. They can **save costs of odor events, which can average more than \$100,000**, guaranteeing passengers and crew a pleasant experience.

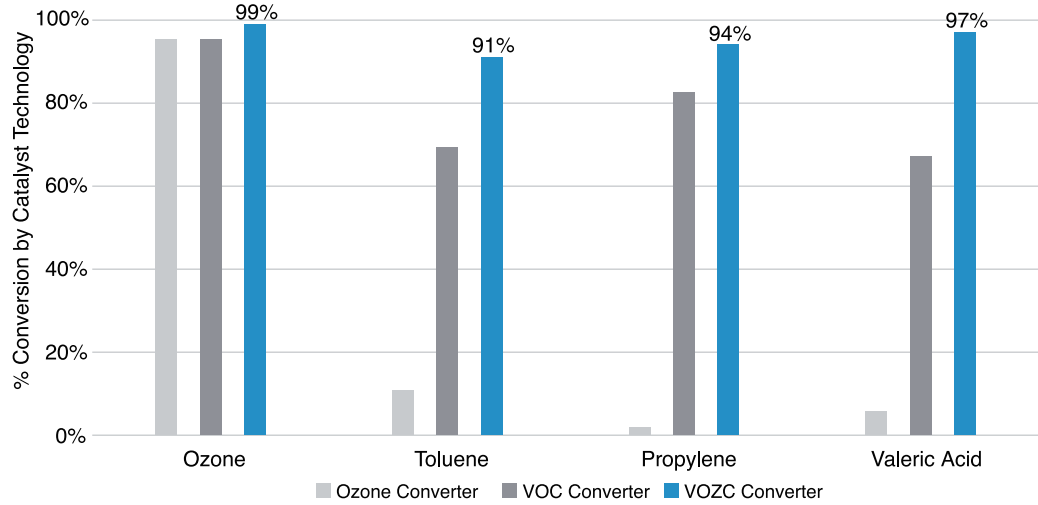

VALUE TO PASSENGERS
AND FLIGHT CREW

Passengers and flight crew **enjoy their stay** in the airplane! Without unpleasant smells like petroleum or dirty socks, they will **have a positive experience onboard**, leave the plane more relaxed and spread the word to **strengthen the airline’s positive image**.

One Number That Matters to You

BASF VOZC OUTPERFORMS ALL KNOWN AVIATION CATALYST TECHNOLOGIES

YOUR BENEFITS WITH BASF VOZC CONVERTERS

- VOZC converters **reduce odor-causing hydrocarbons** while **improving the necessary compliant ozone** conversion function of standard Ozone-only or Ozone-VOC converters.
- Improve aircraft **operational reliability** and **passenger/flight crew comfort** by mitigating odors entering the cabin.
- VOZC technology offers a step-change improvement across a wide array of VOCs, **removing 97 percent of the nastiest odorous VOCs** (valeric acid) in the bleed air entering the cabin.
- **Feel confident** that BASF’s converters have been used on commercial aircraft for over 40 years.
- Reliable partner supplying **quality products and services**, on time, that enable our customers to keep their commitments for **a safe aero-space**.

WHAT’S MORE

BASF also provides an UpCore offering enabling a cost-effective and sustainable technology upgrade for airlines to mitigate these issues. This UpCore™ Service can replace your current Ozone-only or Ozone-VOC catalyst core with an Airbus approved VOZC catalyst core. UpCore™ is a standard procedure that BASF has been performing for numerous years.

YOUR BENEFITS WITH UPCORE™

- **Seamless, cost-effective and sustainable** upgrade from ozone-only converter to Airbus approved Ozone-VOC or enhanced VOZC catalyst technology by reusing the existing housing.
- Reset converter performance to OEM factory-new state of an Ozone-VOC converter that utilizes the **same OEM part number** as a factory-new part without the need of a STC or DER. OEM equipment will meet leasing company requirements.
- **Over 30 years in OEM MRO Service expertise** that ensures confidence in converter performance.
